PRODUCT INFORMATION

CEVO®-process C-3310

Product Description

CEVO®-process C-3310 is a well-balanced lubricant combination.

General Advantages

The mixture was engineered especially for the application in PVC for injection molding and extrusion process.

Examples of Use

The use of the one-pack permits the optimisation of plastification time, improves the flow behaviour of melt, causes a high melt stability and leads to a better demolding of parts. Furthermore the mixture reduces the influence of friction and works, in addition, as a chloride scavenger.
We recommend to add amounts of 1.0 – 1.5 phr.
