

PRODUCT INFORMATION

WARADUR® KME

Product Description

WARADUR® KME is a special wax blend, consisting of esters of long-chain fatty acids (mainly C28 – C32) with multihydroxyl alcohols. The corresponding esters exhibit chain length in the range of mainly C34 – C66. Product for the preparation of aqueous dispersions. A proprietary emulsifier mixture (APEO-free) is already incorporated in this blend.

General Advantages

WARADUR® KME is easy to emulsify. Non-ionic emulsions can be prepared in concentrations of 10 % up to 30 %. Because the wax is self-emulsifying, emulsions are easily prepared by stirring the solid flakes/pastilles into hot water.
